First Time M/M - Great conditions but we were obviously stretched too thin. One op per station plus a fill in. Too much stuff breaking (not working right out of the chute) (and old ops) to do this. Lost 80 meter 4 sq after first night and the middle 15 rotor brake by Sat evening (54 mph gusts decided that this antenna should point West).

We all had a great time and it's only upward from here on!
